# **A PROJECTS PERSPECTIVE:** Where do we place our data and how?

Marie Hoffmann & Dr.-Ing. Christian Adam (contact: [marie.hoffmann@bam.de](mailto:marie.hoffmann@bam.de))

Critical Raw Materials Datamanagement Workshop

BAM, Berlin 26<sup>th</sup> November 2018

**“Data is the fabric of the modern world: just like we walk down pavements, so we trace routes through data, and build knowledge and products out of it.”**

*-Ben Goldacre-*

*British physician, academic and science writer*

## In the following 10 minutes...

---

- What **questions** do we have and why?
- How did we tackle those **questions**?
- !! New **questions** ...!!
- SCALE`s approach

# The SCALE Project

- SCALE is an EU Horizon2020 funded project (GA#730105)

## Background information

---

### 2008 European Commission

- Raw materials initiative
- “strategy for tackling the issue of access to raw materials in the EU”

### Raw materials initiative

Sustainable supply from global markets

Sustainable supply of raw materials from EU sources

Resource efficiency and recycling

### The European Innovation Partnership (EIP) on Raw Materials

- brings together EU countries, companies, researchers, and NGOs to promote innovation in the raw materials sector

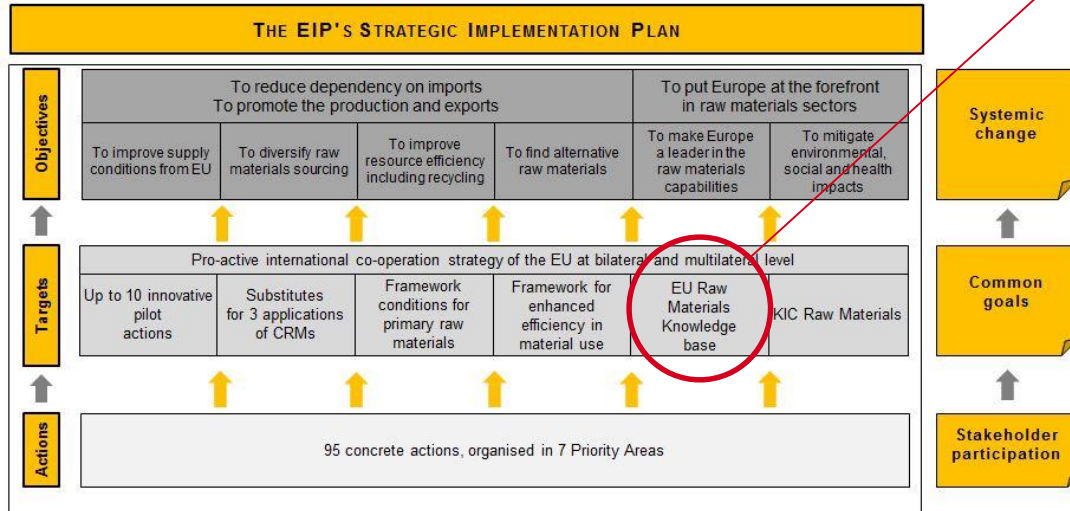

([https://ec.europa.eu/growth/sectors/raw-materials/policy-strategy\\_en](https://ec.europa.eu/growth/sectors/raw-materials/policy-strategy_en))

---

# Background information

## 2013 EIP

- Strategic implementation plan (SIP)
- "action plan of the EIP"

## EU Raw Materials Knowledge Base (EURMKB)

- collect, store, maintain, upgrade, analyse, and disseminate information on the raw materials
- Serve industry and policy makers

## Data collection

- different sources: EUROSTAT, the Joint Research Centre, agencies (such as geological surveys) in EU countries, other national and international organisations, **European projects** and programmes, and industry

([https://ec.europa.eu/growth/sectors/raw-materials/policy-strategy\\_en](https://ec.europa.eu/growth/sectors/raw-materials/policy-strategy_en))

Where do we place our data and how?

## How SCALE has to contribute

---

- SCALE is an EU Horizon2020 funded project (GA#730105)
- BAM: European inventory of Sc containing by-products
- therefore has to provide data

“[...] generated **inventory will be available** through the project web site along with all other publishable data of the project. Especially for the **inventory the data will be shared with the EURMKB web portal** which is **being created by the EuroGeoSurveys** collecting data from EC projects like ProSUM, Minerals4EU, EURARE, MINVNETORY and others. SCALE’s database will be harvested by this Web Portal.”

“[...] results will be **recorded in a CRM byproducts database**, which will also contain the geographical location of each by-product, its estimated quantity, annual production rates and ownership of the by-product [...]”

# What questions do we have?

- What data is useful for such a European Database/Knowledge Platform?
- Are we generating such data? Which data does it take?
- How do we place the data into a European Database.
- **What are the actual pathways?**

**European projects**

Urban Mine Platform

EU CRMKDP

IKMS / EU MKDP

# How did we tackle those questions?

- Gathering information
- Visiting events
- Networking

## ProSUM Information Network

Friday, 10 November 2017  
Hôtel Le Plaza Bruxelles, Boulevard Adolphe Max 118-126, 1000 Brussels

v9\_Final

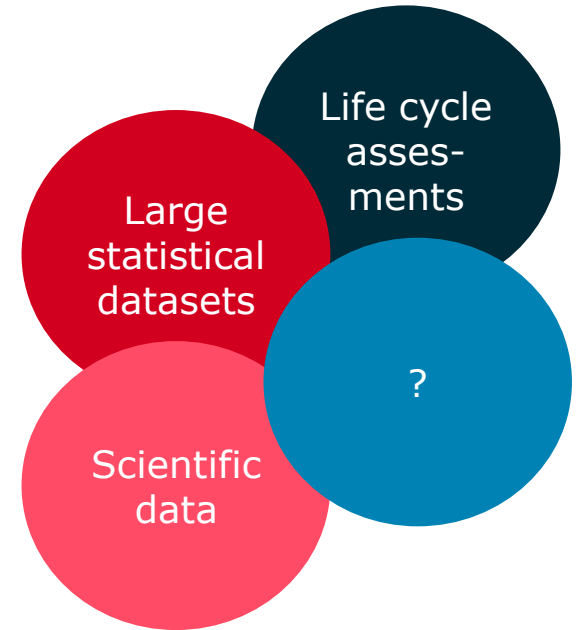

## !! New questions !!

---

- What data is actually necessary?
- What kind of data are we talking about?
- **What are the pathways?**
- **Who is maintaining project based databases such as ProSUM, IKMS, CRMKDP?**

- **Most of these things do not seem clear yet(?)**

## SCALE's Approach

---

– WORKSHOP

– Using existing structures within our consortium

– **MOKKA/ENFO database**

– **Building of structured datasets for website and possible database!**

SCALE environmental database on ENFO

KÖRNYEZETVÉDELMI  
INFORMÁCIÓ

Author: Viktória Fejgi

Scandium containing wastes and by-products in Europe

SCALE - Scandium Aluminium Europe: Environmental information on scandium containing wastes

Welcome to the SCALE environmental database at ENFO!

This database aims at summarizing environmental information on scandium containing wastes and by-products in Europe.

The database is connected to "SCALE: Production of Scandium compounds and Scandium Aluminium alloys from European metallurgical by-products" project funded by Horizon 2020 under grant agreement No. 730105. For more info on the project, please visit the SCALE website!

Please, start your visit at our list of scandium containing wastes above!

**Can we bring some light into the darkness today?**
